Simulation Logs:

Simulation stopped at '1.3700000000000001' because there is no input data after this time point.

Insufficient space for computing symbol names in model '[Eas Integrated](#)'. The maximum identifier length '31' does not provide sufficient space to make symbol names unique using the symbol format string in 'Subsystem

methods'. This is required when using model reference. Consider increasing the maximum identifier length. To eliminate this message enter the command
`set_param('Eas_Integrated', 'ModelReferenceSymbolNameMessage', 'none')`
at the MATLAB prompt.

Insufficient space for computing symbol names in model '[Eas_Integrated](#)'. The maximum identifier length '31' does not provide sufficient space to make symbol names unique using the symbol format string in 'Global types'. This is required when using model reference. Consider increasing the maximum identifier length. To eliminate this message enter the command
`set_param('Eas_Integrated', 'ModelReferenceSymbolNameMessage', 'none')`
at the MATLAB prompt.

The model Web view is not generated during simulation. When simulation is finished, use the following command to regenerate the report.
`rtw.report.generate('Eas_Integrated')`
